Amendments to the Claims

Please amend the claims as follows (the changes are shown with strikethrough for deleted matter and <u>underlining</u> for added matter). A complete listing of the claims is set out below with proper claim identifiers.

- 1. (Original) A thermoplastic elastomer composition comprising:
- (A) a composition obtained by crosslinking an isobutylene polymer having an alkenyl group at the molecular ends with a hydrosilyl group-containing compound while melt-kneading in the presence of at least one kind selected from the group consisting of an aromatic vinyl-containing thermoplastic elastomer and an olefinic resin, and
- (B) at least one kind selected from the group consisting of an aromatic vinyl-containing thermoplastic elastomer and an olefinic resin.
- 2. (Original) The thermoplastic elastomer composition according to claim 1, wherein the content of at least one kind selected from the group consisting of an aromatic vinyl-containing thermoplastic elastomer and an olefinic resin is from 5 to 100 parts by weight based on 100 parts by weight of the isobutylene polymer having an alkenyl group at the molecular ends in the component (A).
- 3. (Currently Amended) The thermoplastic elastomer composition according to elaim 1 or 2 claim 1, wherein the content of the component (B) is from 5 to 100 parts by weight based on 100 parts by weight of the total amount of the component (A).
- 4. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 3claim 1, which further contains a softener (C) in the amount of 1 to 300 parts by weight based on 100 parts by weight of the isobutylene polymer having an alkenyl group at the molecular ends in the component (A).
- 5. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 4claim 1, wherein an allyl group is introduced into the

molecular ends of the isobutylene polymer having an alkenyl group at the molecular ends in the component (A) by a substitution reaction of allyltrimethylsilane and chlorine.

- 6. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 5 claim 1, wherein the isobutylene polymer having an alkenyl group at the molecular ends in the component (A) is a polymer which has a number average molecular weight of 1,000 to 500,000 and has at least 0.2 alkenyl groups per one molecule at the molecular ends.
- 7. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 6 claim 1, wherein the isobutylene polymer having an alkenyl group at the molecular ends in the component (A) is a polymer having 50% by weight or more of isobutylene.
- 8. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 7claim 1, wherein the aromatic vinyl-containing thermoplastic elastomer in the components (A) and (B) is a block copolymer comprising a polymer block (a) composed mainly of an aromatic vinyl compound and a polymer block (b) composed mainly of isobutylene.
- 9. (Original) The thermoplastic elastomer composition according to claim 8, wherein the aromatic vinyl-containing thermoplastic elastomer in the components (A) and (B) is a block copolymer is a triblock copolymer which has a structure comprising a polymer block (a) composed mainly of an aromatic vinyl compound a polymer block (b) composed mainly of isobutylene a polymer block (a) composed mainly of an aromatic vinyl compound, and has a weight average molecular weight of 40,000 to 200,000.
- 10. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 9claim 1, wherein the olefinic resin in the component (A) is polypropylene.

- 11. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 9claim 1, wherein the olefinic resin in the component (A) is polyethylene.
- 12. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 11 claim 1, wherein the olefinic resin in the component (B) is polypropylene.
- 13. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 1 to 11 claim 1, wherein the olefinic resin in the component (B) is polyethylene.
- 14. (Original) The thermoplastic elastomer composition according to claim 10, wherein the olefinic resin in the component (A) is random polypropylene.
- 15. (Original) The thermoplastic elastomer composition according to claim 11, wherein the olefinic resin in the component (A) is high-density polyethylene.
- 16. (Original) The thermoplastic elastomer composition according to claim 12, wherein the olefinic resin in the component (B) is random polypropylene.
- 17. (Original) The thermoplastic elastomer composition according to claim 13, wherein the olefinic resin in the component (B) is high-density polyethylene.
- 18. (Currently Amended) The thermoplastic elastomer composition according to any one of claims 4 to 17 claim 4, wherein the softener (C) is paraffinic oil.
